

Energy Efficiency
PROGRAM

Hot Summer Savings

Water heaters are one of the highest sources of energy usage in your home. Replace your standard water heater with a heat pump water heater and start lowering your monthly energy bill.

Incentives and rebates are currently available from the Ameren Illinois Energy Efficiency Program to help offset the cost of purchasing your new heat pump water heater.

Why Buy a Heat Pump Water Heater?

An ENERGY STAR® certified heat pump water heater uses 70% less electricity to make the same hot water as a standard electric model.*

Using less electricity to heat the same amount of water as a standard water heater means you save more on your monthly energy costs.
