

Municipalities, Co-ops & Utilities

Why Choose AEM for Your Wholesale Needs?

Choice – AEM offers a variety of full-requirements energy products that are designed to minimize risk associated with changing market conditions. Our goal — to provide ongoing protection from exposure to commodity price volatility — ensuring that our wholesale customers can compete in today's rapidly changing environment.

Service – AEM's real time trading floor is staffed 24/7 by energy trading and operations professionals who monitor market conditions and respond to customer needs every hour of every day. Our expertise and commitment to customer service allows our customers to focus on their operations while we assist in managing their energy needs. From the sales executive to the account manager and billing specialist – AEM works to ensure our customer's commitment is fulfilled.

Strength – AEM markets over 6,000 megawatts of competitive generation and is one of the largest electricity providers in the U.S. Leveraging years of experience in the energy business and with our comprehensive knowledge of the energy markets, we help our customers find opportunities in the marketplace.

Let AEM give you the power to succeed.

We develop energy solutions for:

- Municipal Utilities
- Electric Cooperatives
- Investor-Owned Utilities
- Aggregators
- Retail Electric Suppliers
- Financial Institutions

Protecting the Environment

Ameren Corporation has some of the cleanest coal-fired plants in the United States. We help improve the environment by preserving habitat for wildlife, eliminating or reusing byproducts and reducing emissions. For more information, review our corporate environmental report at <http://www.ameren.com/EnvReport>.
