**Brief Explanation** (This will be copied into the description in the Change Control Summary Spreadsheet):

Clean up 2 issues in the 810 documentation. No operational impact.

**Detailed Explanation** (Exactly what change is required? To which Illinois CPWG Standards? Why?):

The implementation notes list 4 potential responses to an 810 Bill Ready transaction with an 824. At the ICC Workshop on 1/27/09, it was decided that the utility will only send an 824 confirmation that the RES charges were presented on the bill. The 824 Acceptance will not be used. Remove the reference to the 824 Acceptance from the guide on page 4.

The introduction of the 810 invoice on page 5 of the guide shows the use of the NTE segment, which is not used and not included in the detail section. The introduction does not include the PID segment, which is listed in the detail section. The use of the field is for the supplier bill messages on the bill. Remove reference to the NTE segment, and add a reference for the PID segment on page 5.
