**Brief Explanation** (This will be copied into the description in the Change Control Summary Spreadsheet):

Review changing the 867 HU guide to state that there will be multiple PTD\*BQ loops.

**Detailed Explanation** (Exactly what change is required? To which Illinois CPWG Standards? Why?):

Ameren is requesting that the 867 HU Implementation Guide be modified to state that multiple PTD\*BQ (interval data) loops be allowed and that they be supplied by service point. This will enable the Utility to supply interval usage by month in 24 BQ loops instead of 24 months of interval usage all in one BQ loop. Each BQ loop will represent an aggregation of all interval meter data for a given service point during a specified bill cycle.
