Requester's Name: George Behr	Requester's Organization: ESG	Phone #: 7179571927
Date of Request: 8/20/09	Affected EDI Transaction Set #(s): 867	E-Mail Address: gBehr@EnergyServicesGroup.net
Requested Implementation Date: 10/17/09	Status:	
Requested Priority: (emergency/high/low/project): high	If Priority is "Project" then specify Project Name:	

Brief Explanation (This will be copied into the description in the Change Control Summary Spreadsheet):

The IG needs to clarify that all the PTD*PM is intended for interval data, and if used should include intervals.

Detailed Explanation (Exactly what change is required? To which Illinois CPWG Standards? Why?):

The PTD*PM is marked as optional in the IG, and serves dual X12 purpose both as a segment and as a looping structure. Parties when opting to use the PTD*PM must provide the required intervals, ie multiple QTY loops for each interval, and X12 210-level DTM*582 that identify the interval date and time, adhering to the meter type (e.g. KH060). Parties need to either provide the required elements of the PTD*PM, or do not include the entire PTD*PM loop, not a hybrid in between. Example of code from test that violates required elements of the PTD*PM (note lack of DTM*582 at bottom and repeat of of DTM*150/151 at both position 020 and again in the QTY loop at position 210.)
