**Brief Explanation** (This will be copied into the description in the Change Control Summary Spreadsheet):  
 Change the 867MU Implementation Guide such that the Meter Multiplier is only required if it is a value other than 1.

**Detailed Explanation** (Exactly what change is required? To which Illinois CPWG Standards? Why?):  
 Change the 867MU Implementation Guide such that the Meter Multiplier is only required if it is a value other than 1. Once implemented, this will be consistent with the recent change made to the 867MU Implementation Guide concerning the Transformer Loss Multiplier (which is also now only being populated if it is a value other than 1).
