## **Public Postings of Transmission Function Information**

One of Ameren's Marketing Affiliates requested and received load flow models from the Transmission Function. The Affiliate wants to use these models to analyze congestion associated with its generating plants and associated with transmission services, as well as to support its participation in Midwest ISO regional planning activities. This model information is public information that was posted on the Midwest ISO's extranet site; however, the information has been removed due to its age. The load flow models were provided for the following dates:

4/13/2008  
4/5/2008  
4/1/2008  
3/31/2008  
3/26/2008  
2/19/2008  
1/24/2008  
1/12/2008

Ameren's Transmission Function will provide the same or similar data to other Market Participates if requested.
