

Thank you **Monsanto**

**for being a Pure Power
Full Turbine Champion!**

Monsanto is helping to promote cleaner air and a stronger local economy by supporting more than the annual renewable energy output of a full 260-foot-tall wind turbine. With this commitment, Monsanto prevents 5,634 metric tons of carbon dioxide from entering the atmosphere each year — the same carbon reduction provided by 4,695 acres of forest or taking 1,220 cars off the road each year.

Monsanto is supporting a cleaner and stronger community and so can you. To learn more about the Pure Power program or to enroll, please visit www.ameren.com/purepower or call 1-866-665-PURE (7873).
