Easy Tips to Save Energy and Money

POWER TO SAVE

You have the power to save and keep your energy costs low. Use this helpful checklist full of energy-efficient tips to get your home ready for colder weather.

✓ ENERGY EFFICIENCY FALL CHECKLIST

-  Replace your home's five most used lightbulbs with ENERGY STAR® certified bulbs and save up to \$75 a year.
-  Weatherstrip doors and windows, and caulk and seal air leaks to save up to 20% on your energy bill.
-  Set the water heater temperature to 120° F or lower to conserve energy and save money.
-  Install a Wi-Fi-enabled smart thermostat and save with Peak Time Savings. Optimize your energy savings by programming it to 68° F in the winter.
-  Routinely replacing and cleaning the air filters in your HVAC system can reduce its energy consumption by 15%.
-  In the winter, reverse the motor and operate your ceiling fans at low speed in a clockwise direction. This produces an updraft, forcing warm air downward.
-  Conduct a self-led home energy assessment for a list of recommendations to improve your home's energy efficiency, plus get a \$50 incentive. Learn more at AmerenMissouriSavings.com/RealEstate.
