Ameren Missouri's Easy Guide to Saving Energy and Money

With these tips, you have the *Power to Save* and keep your energy costs low.

POWER
TO SAVE

LIGHTING TIPS

- Simply **turn off the lights** when you leave a room.
- Use ENERGY STAR® certified LED bulbs.** They last 25 times longer and use up to 80% less energy than traditional bulbs.
- Replace the five most frequently used light fixtures** or bulbs in your home with ENERGY STAR® certified bulbs and you can save \$75 a year.

WATER TIPS

- Turn off the faucet** while brushing your teeth or shaving.
- When doing laundry, **wash full loads using the cold water setting.**

HEATING AND COOLING TIPS

- Open curtains and blinds** during the day to heat your home during the winter. **Close them** in the summer to keep your home cool.
- Program your thermostat** for the times when you're home, at work and asleep. Adjusting your thermostat by just one degree could decrease your bill by as much as 3%.

APPLIANCE TIPS

- Always **unplug chargers** when not in use because they use energy even when not actively charging.
- Buy smart power strips** for your electronics — they can cut your energy use by up to 10%.
- When replacing appliances or electronics, **look for the ENERGY STAR® label**, which identifies high-efficiency products.
