

Illinois CPWG Change Request

This Illinois CPWG Change Request can be found on the Illinois CPWG website at
<http://www.choiceinillinois.com>

Requester's Name: Patrick Eynon	Requester's Organization: Ameren	Phone #: 314-554-4110
Date of Request: 01-05-2023	Affected EDI Transaction Set #(s): 867HU	E-Mail Address: peynon@ameren.com
Requested Implementation Date: 03-23-2023	Status:	
Requested Priority: (emergency/high/low/project): High	If Priority is "Project" then specify Project Name:	

Brief Explanation (This will be copied into the description in the Change Control Summary Spreadsheet):
 Change Control #053:
 Update the EDI 867HU Implementation Guide to allow for the sending of up to eight NSPL values per service point.

Detailed Explanation (Exactly what change is required? To which Illinois CPWG Standards? Why?):
 Change Control #053:
 In late August 2022, FERC approved MISO's request to change to a seasonal-based capacity construct which will become effective with the 06-01-23 – 05-31-24 MISO planning year. The pending seasonal NSPL values that will take effect with the 06-01-23 – 05-31-24 MISO planning year were calculated in December 2022. The 867HU Implementation Guide currently mentions the sending of only up to two NSPL values (one current planning year NSPL and one pending planning year NSPL) per transaction. Ameren proposes updating the Notes section of the QTY (Transmission Contribution – NSPL) segment in the 867HU Implementation Guide to allow for the sending of up to four current planning year NSPL values and up to four pending planning year NSPL values (for a grand total of up to eight NSPL values) per transaction.
