

# Stay Connected with the BizSavers® Program

## The BizSavers Team is Here for You

At Ameren, safety is one of our core values, and we are taking actions to help ensure the safety of our co-workers, our facilities and the communities we serve. While the BizSavers program has temporarily suspended all site visits and in-person meetings, we have transitioned to virtual platforms for inspections, design team meetings and energy efficiency evaluations so work can continue and the savings won't stop. Our team is fully equipped to host virtual meetings and inspections and is available via phone and email for any questions related to new or existing energy efficiency projects.

## What does this mean for new projects?

We understand that energy efficiency may not be at the top of your priority list right now, but increasing your facility's efficiency can be a powerful recovery tool, offering relief by reducing your ongoing operating costs. While now may be a difficult time to purchase and install new equipment, the BizSavers program team is here to help reduce that up-front cost for qualifying equipment.

Our team is available via phone and email to discuss your options and help guide you to the best technologies and Trade Allies to get you started, and quickly finish your energy efficiency projects. Contact our team and we'll help you save energy and money.

## What does this mean for my existing project?

For existing projects, we will be as flexible as possible, within the guidelines of the program, when it comes to installation schedules and project timelines. We will also participate in virtual post-inspections via video chat or accept photos of installed efficient equipment in lieu of an on-site visit.

Please contact your Business Development Representative or the BizSavers team for any questions related to your project and we will be happy to assist.
