

Truck Stop Electrification

Plug Into the Benefits

Did You Know?

Ameren Missouri customers can provide long-haul truck drivers with a comfortable, cleaner and safer place to rest with truck stop electrification (TSE). TSE also helps drivers comply with state requirements on anti-idling. On average, 135 metric tons of greenhouse gas emissions are reduced per truck unit using electricity compared to fuel.

TSE Makes Sense

- TSE saves drivers and fleets money by eliminating extended diesel idling.
- Truck owners can see significant reduction in fuel and maintenance costs and engine wear.
- TSE eliminates air pollution and noise that nearby communities associate with idling diesel trucks.
- TSE gives drivers comfort and safety while complying with state idling laws.

Free Consultation

As an Ameren Missouri customer, you can get a free consultation to help you discover how making the switch to electric can enhance your business. When you schedule a consultation, you will meet with an Energy Solutions account member to:

- Review existing truck stop characteristics, operational habits and available infrastructure
- Discuss the benefits and advancements of TSE
- Receive full cost-benefit and emission-reduction analysis
- Develop a customized recommendation report
