

DER Bulletin 2026-02

Updates to DER Interconnection Policy Public Facing Guide

This communication announces the publication of Revision 2.0 of the "AIC DER Interconnection Policy Public Facing Guide," which replaces Revision 1.1. This updated policy reflects Ameren Illinois' ongoing commitment to facilitating safe and reliable DER integration while providing enhanced transparency in interconnection requirements. It is the responsibility of DER developers to thoroughly read and understand the updated policy requirements. The updated policy is effective immediately.

Revision 2.0 includes several key changes to interconnection requirements and procedures, some of which include updated stability screening criteria, additional information related to limited and non-exporting systems, updated cost estimates for typical interconnection costs, and an expanded power plant controller requirement for remotely located generation systems.

The complete updated policy document is available on the Ameren Illinois Renewables website on the Developer Resources page: <https://www.ameren.com/service/renewables/developers>. The document can be found at the bottom of the page under "More Resources."

Additional questions related to the updated interconnection policy should be submitted to renewablesillinois@ameren.com.
