

AMEREN MISSOURI'S ENERGY ROADMAP

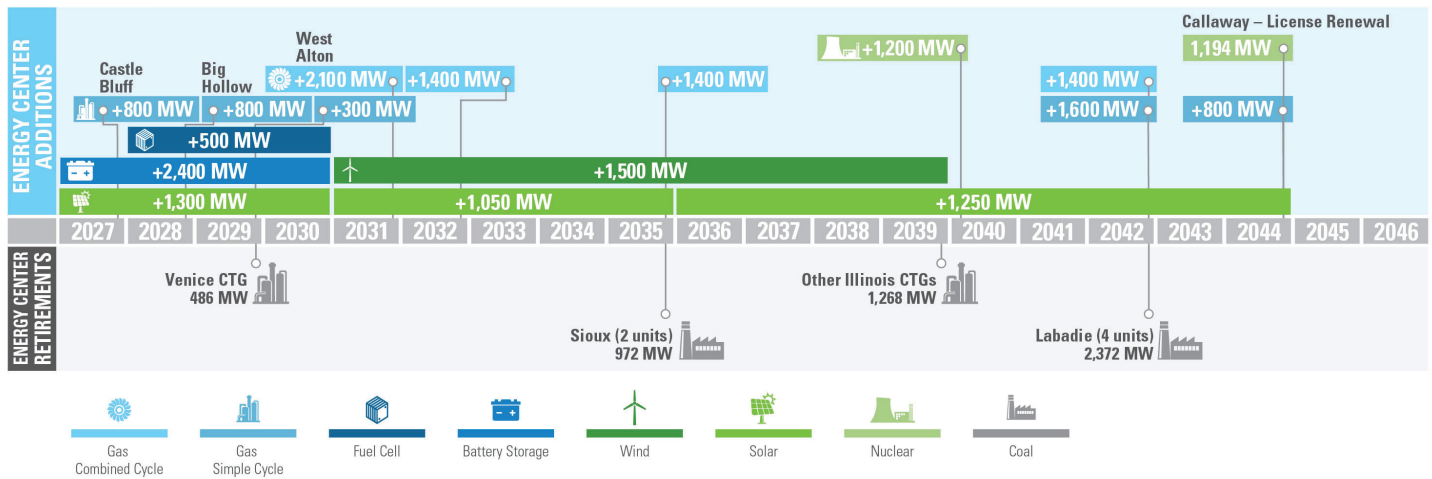

A disciplined, long-term plan to meet customers' evolving energy needs

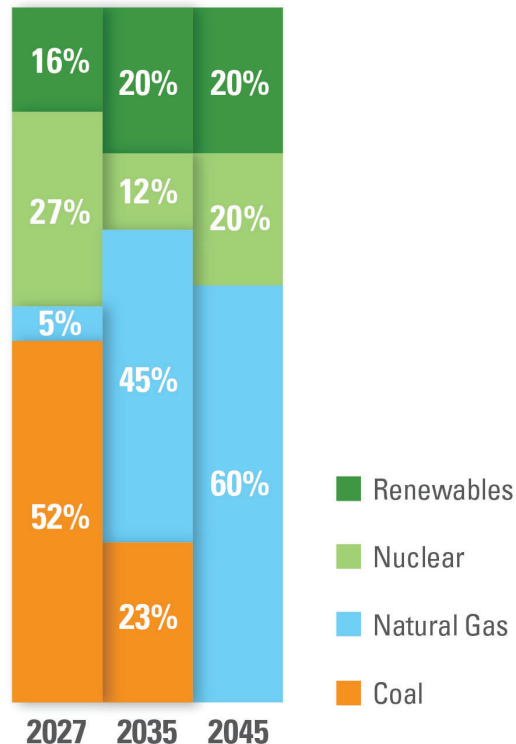

Highlights of the 2026 Integrated Resource Plan (IRP) include:

- A long-term roadmap for reliable service designed to keep energy available when customers need it most.
- A disciplined approach to managing costs over time while continuing to meet customers' energy needs.
- Support for communities across Missouri through planning that takes future growth and customer needs into account.
- An evaluation of multiple future scenarios to maintain flexibility as future conditions evolve.

Preferred Plan Timeline

Anticipated Energy Mix

A PLAN BUILT AROUND CUSTOMER NEEDS

Balanced Energy Portfolio

Bringing together a mix of energy resources designed to perform under different conditions.

Strengthening the Energy System

Adding new capabilities to a balanced mix of resources in support of future energy needs.

Managing Costs

Optimizing existing resources and supporting thoughtful, long term-decisions that balance customers' energy needs, reliability and costs.

Supporting Economic Development

Ensuring the electric system can continue to support expanding communities across Missouri.
