

ENVIRONMENTAL REVIEW AND STEWARDSHIP

MILLCREEK BESS ENERGY CENTER

STUDIES COMPLETED

Preliminary Environmental Site Assessment

Reviewed historical and current site conditions. No recognized environmental concerns were identified.

Water and Drainage Studies

Evaluated streams, drainage features, flooding and stormwater considerations to support project design.

AGENCY COORDINATION

Working with environmental and permitting agencies throughout project review and planning.

Examples Include:

**U.S. Army Corps
of Engineers**

Stream crossings and waterway permitting and review.

**U.S. Fish and
Wildlife Service**

Potential habitat considerations before any related tree clearing occurs.

DESIGNED TO PROTECT WATER RESOURCES

Battery storage facilities do not require ongoing water use to store electricity. Site plans include stormwater management and containment features designed to keep runoff managed on-site and help protect nearby waterways.
