

APPROVED ROUTE MAP

DISCLAIMER: This map depicts the location of the Illinois Commerce Commission (ICC) approved route as a 500-foot-wide corridor. The required easement width for the transmission line will be 100 feet. This map is based on information/data available to Ameren Transmission Company of Illinois (ATXI) at this time and is prepared to help provide a fair visual representation of the location of transmission facilities for easement discussion purposes. It does not represent the exact final location of the transmission line, which is subject to adjustment, change, or modifications (consistent with the ICC approved route) once the necessary field or property surveys have been conducted.
