

Ameren Missouri Pay As You Save Program

Rebates valid between January 1 and December 31, 2025.

Pay As You Save Rebate Measures (AHRI rated)	Rebate
Heating and Cooling Rebates*	
Mini-Split Air Conditioner or Heat Pump – 19+ SEER2	\$500 per ton
ASHP Dual Fuel – 15.2+ SEER2	\$2,000 per system
Central Air Conditioner – 15.2+ SEER2	\$1,000 per system
Air Source Heat Pump Replacing Air Source Heat Pump – 15.2+ SEER2	\$2,000 per system
Air Source Heat Pump Replacing Electric Resistance – 15.2+ SEER2	\$2,000 per system
Air Source Heat Pump (No Existing Central System) – 15.2+ SEER2	\$2,000 per system
Ground Source Heat Pump Replacing Ground Source Heat Pump – 23+ EER2	\$5,000 per system
Smart Thermostat – ENERGY STAR® or on Approved List	\$250 per thermostat
Weatherization†	
Air Sealing	\$0.06 per sq. ft.
Ceiling/Attic Insulation	\$0.20 per sq. ft.
Duct Sealing/Repair	50% of costs up to \$250 per home
Air Sealing (Infiltration Reduction)	\$0.06 per sq. ft.

Air Sealing – Seal and reduce air leakage. Areas may include but are not limited to:

- Attic penetrations and top plates
- Crawl space penetrations
- Penetrations under sinks
- Interior equipment closets
- Doors and windows
- Light switch/plug covers

Duct Sealing/Repair – Seal and repair exposed duct system to improve a home's ventilation rate.

Ceiling/Attic Insulation – Installation of blown-in cellulose insulation to a minimum of R-38 (R-value). Insulation marked with R-sticks beginning at the air barrier.

To be eligible for HVAC or weatherization rebates you must participate in tier 4 of the PAYS program. Rebates will reduce the total cost of the upgrades. Must have lived in the home for the past 12 months to allow for a usage analysis.

***HVAC:** At least one of the following conditions: the AC unit was installed at least 10 years prior to the program appointment, AC efficiency is rated 14 SEER or less, and the AC is no longer working.

†**Air Sealing:** Must be able to achieve a 20% leakage reduction. **Duct Repair/Sealing:** Must be able to achieve a minimum of 20% leakage reduction.

Attic/Ceiling Insulation: Must have a beginning R-value of 20 or below with a minimum increase to R-38.
