Re: 0190100008--Champaign County
Champaign/IP Town Gas
Site Remediation Program/Technical Reports

Dear Mr. Martin:

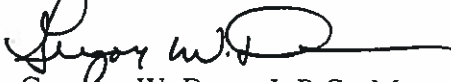

The Illinois Environmental Protection Agency ("Illinois EPA") has completed review of the *Groundwater Monitoring Update – Quarter 2 2011 Sampling Event and Shallow Groundwater Classification Field Hydraulic Conductivity Testing* ("Groundwater Sampling Event"). The Groundwater Sampling Event was received by the Illinois EPA on August 23, 2011 (Log No. 11-48528). The Illinois EPA approves of the above Groundwater Sampling Event with the following comments.

1. The Illinois EPA has reviewed the hydraulic conductivity testing on five shallow monitoring wells located off-site and concurs the shallow groundwater meets the definition of a Class II groundwater pursuant to 35 Illinois Administrative Code Part 620. The lower aquifer is still classified as a Class I aquifer.
2. On Page 3 of the Groundwater Sampling Event under the Groundwater Monitoring Results heading, the second sentence should state that two of the 21 monitoring wells exceeded either Class I or Class II standards.
3. The Illinois EPA has been informed the next quarterly groundwater sampling event is scheduled for September 12-14, 2011. The Illinois EPA will be

collecting split samples of two of the off-site monitoring wells during this sampling event.

All future submittals to the Illinois EPA concerning the Illinois Power Town Gas site in Champaign should include one original and two copies of each document. If you have any questions, please feel free to contact me at above telephone number, address or e-mail me at Greg.Dunn@illinois.gov.

Sincerely,

Gregory W. Dunn, L.P.G., Manager
