Re: 0190100008--Champaign County  
Champaign/IP Town Gas  
Site Remediation Program/Technical Reports

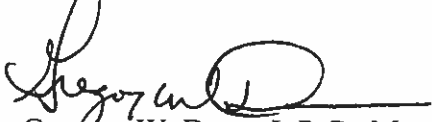

Dear Mr. Martin:

The Illinois Environmental Protection Agency ("Illinois EPA") has completed review of the *Groundwater Monitoring Update – Quarter 3 2012 Sampling Event Champaign Former MGP Site, Champaign, Illinois* ("Groundwater Report"). The Groundwater Report was received by the Illinois EPA on February 27, 2012 (Log No. 13-53170). The Illinois EPA approves of the above Groundwater Report with the following comments.

1. The text indicates Duplicate 01 was collected at UMW-302 and Duplicate 02 was collected at UMW-305. Reviewing the analytical data, Duplicate 01 was a duplicate of UMW-305 and Duplicate 02 was a duplicate of UMW-302. The analytical data comparing these results are very similar and no changes are recommended to the monitoring well sampling procedures. No action is warranted for this comment.
2. The acenaphthene concentration at UMW-108 should not be designated with a less than according to the analytical data sheets. However, the concentration detected in this sample was 0.0001 mg/l which is well below the Class II groundwater standard of 2.1 mg/l for this compound. No further action is required for this comment.
3. Please continue to notify the Illinois EPA at least two weeks prior to the next sampling event.

All future submittals to the Illinois EPA concerning the Illinois Power Town Gas site in Champaign should include one original and two copies of each document. If you have any questions, please feel free to contact me at above telephone number, address or e-mail me at [Greg.Dunn@illinois.gov](mailto:Greg.Dunn@illinois.gov).

Sincerely,

Gregory W. Dunn, L.P.G., Manager
