**Material Description**

- **FI**: Silty CLAY with trace coal fragments; dark brown; no visible impact; no odor; damp; (FILL)
  - 0-4 ft: 75

- **CL**: CLAY; light brown; no visible impact; stiff; no odor; damp; (CL)
  - 3.5" sand seam; fine grained; light brown; wet
  - 8-12 ft: 100

- **CP**: SAND with some clay; light brown; no visible impact; very soft; no odor; wet; (SW)
  - 7.0' - Sandy CLAY with trace gravel; no visible impact; medium stiff; no odor; moist; (CL)
  - 8.0' - CLAY; light brown with gray motting and trace gravel; no visible impact; slight pterro-like odor; (CL)
  - 12-15 ft: 100

- **TL**: Sandy CLAY with trace gravel; light brownish gray; no visible impact; soft; no odor; wet; (CL)
  - 15-18 ft: 100

- **TL**: Silty CLAY with trace gravel and sand; light gray; no visible impact; medium stiff to stiff; no odor; moist; (TILL)
  - 18-21 ft: 100

- **TL**: Silty CLAY with trace gravel; no visible impact; stiff; no odor; moist; (TILL)
  - 21-24 ft: 75

- **TL**: Silty CLAY with trace gravel; very hard
  - 24-27 ft: 100

- **TL**: Silty CLAY with trace gravel; very hard
  - 27-30 ft: 100

**Termination of boring at 30.0’ on 4/4/08**
