

# AMEREN ILLINOIS

DELIVERING SAFE, RELIABLE ENERGY THROUGHOUT CENTRAL AND SOUTHERN ILLINOIS

## COMPANY OVERVIEW

Headquartered in Collinsville, Ameren Illinois is the state's second largest regulated energy company and the only utility in the state delivering both natural gas and electric to its customers. Ameren Illinois serves 1.2 million electric customers and 816,000 natural gas customers in central and southern Illinois. As an energy delivery company, Ameren Illinois owns and maintains the wires, poles, substations and enabling technology that distributes power to homes and businesses. Ameren Illinois has more than \$2.5 billion in revenue. Its parent holding company is St. Louis-based Ameren Corporation.

## SERVICE TERRITORY

Our service territory spans 43,700 square miles, or about three-quarters of the state, and is divided into six divisions. More than 3,400 employees are working to strengthen our electric and natural gas infrastructure for the future, while providing reliable energy and excellent service.

**OUR MISSION –** “To Power the Quality of Life.”

## ENERGY EFFICIENCY

In 2017, the Illinois Commerce Commission approved Ameren Illinois' plan to provide \$20 million a year to deliver energy efficiency services to moderate-income to low-income customers. Ameren Illinois will provide incentives for central air conditioning, insulation, efficient furnaces and health and safety repairs. These programs will make a real difference in the lives of customers and help them save on their energy bills over the long term.

## NATURAL GAS

18,300 miles of natural gas transmission and distribution mains and 12 underground natural gas storage fields with a total capacity of approximately 25 billion cubic feet.

## COMMUNITY INVOLVEMENT

Annually, more than \$3 million is donated to charitable organizations through our Ameren Cares program. Ameren Cares connects our company to the communities it serves through charitable giving and employee volunteerism.

## SMART GRID

Ameren Illinois is investing billions to build a next generation energy delivery system and create jobs in central and southern Illinois. We're fortifying and storm-hardening our poles and wires, installing ground-breaking technology that can detect a power outage and switch to an alternative feed to minimize the disruptions to our customers. We're installing smart meters that will share data with us and allow customers to manage and control their energy usage and costs. Illinois ranked #2 nationally for smart grid policy.

## ELECTRIC

We deliver safe, reliable electric service to more than 1,200 communities in 89 counties. Our complex delivery system includes about 4,600 miles of electric transmission lines, 46,000 miles of distribution lines (15% underground), 1,500 electric substations and more than 1.3 million power poles.
