

ELECTRIC VEHICLE CHARGING FOR BUSINESS

Ameren Missouri is your workplace electric vehicle charging resource.

Electric vehicles are becoming more common in Missouri because they are fun and exciting to drive, easy to charge and cost less to fuel and maintain.

Offering employees electric vehicle charging can enhance satisfaction and provide many benefits:

Establish your company as a leader in sustainability and innovation

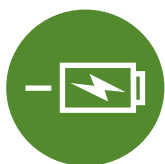

Act as an employee incentive that can enhance recruitment and retention efforts

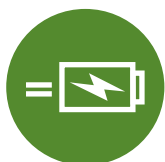

Provide a highly valued employee benefit

Charging options:

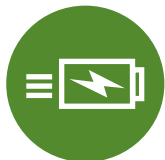

A range of electric vehicle charging options at various speeds are available, with Level 2 chargers most common at workplaces.

Level 1 chargers are the least expensive and charge the slowest by providing 4 miles of range per hour, or 32 miles over 8 hours. This pace can serve employees who do not require faster refueling.

Level 2 chargers are common among workplaces because they support charge rates of roughly 25 miles of range per hour. Faster chargers provide flexibility to develop parking policies allowing employees to rotate their cars during the day if needed to accommodate growing numbers of electric vehicles.

DC fast chargers are most often located along well-traveled thruways and can provide up to 80% of a vehicle's charging need in 30 minutes.
