

2019-2023 SOLAR REBATES

- Solar Rebates are part of the Smart Energy Plan (SB564) that was passed by the legislature in May
- \$28 million dollars over 5 years according to the following schedule:
 - 2019 - \$10.0 million
 - 2020 - \$5.6 million
 - 2021 – \$5.6 million
 - 2022 - \$5.6 million
 - 2023 - \$0.4 million
 - Low-Income (2019-2023) - \$0.8 million
- Solar Rebate Tariff became effective on September 28, 2018
- Solar Rebate, Net Metering, and Qualifying Facilities applications will be on line at www.Ameren.com.
- **Solar Rebate applications will accepted on line beginning November 1, 2018**. Net metering and Qualifying Facilities applications can be accepted now.
- Funding availability is displayed on the application website and customers will be told, at the time of application, if they have received funding.
- Net Metering or Qualifying Facilities applications can be submitted now but must be submitted no later than 60 days after solar rebate application.
- **The solar rebate applies to systems operational on or after January 1, 2019**. We consider a system operational after the bi-directional meter is installed. If no meter is required then it is when completed Sections E and F of a net metering or qualifying facilities application are returned to Ameren Missouri.

- The rebate schedule is based on when the system becomes operational as follows:
 - January 1, 2019-June 30, 2019--\$0.50 per watt
 - July 1, 2019-December 31, 2023--\$0.25 per watt

- Maximum solar system size for a solar rebate for a Residential customer is 25 kW
- Maximum solar system size for a solar rebate for a Commercial or Industrial customer is 150 kW.
- Maximum solar system size to qualify for net metering is up to the load of the facility or 100 KW.
- The website, www.ameren.com, will be updated soon to reflect the above information.
