

## **COMMUNITY SOLAR TERMS AND CONDITIONS AGREEMENT**

### **1. Billing**

A. All terms and conditions of the customer's applicable standard service classification tariff shall apply to this Program with the following exception: The Solar Blocks supplied under this Program, pursuant to the customer's subscribed amount, will replace an equal amount of kWh the customer would otherwise be billed under their Energy Charge.

B. All other usage-based charges in the customer's applicable tariff schedule will be billed at the actual metered electricity usage.

C. Payments for Solar Blocks will be due no later than the due date shown on the bill and will be incorporated into the customer's standard billing cycle.

D. Any customer being served or having been served on this Program waives all rights to any billing adjustments arising from a claim that the customer's service would be at a lower cost had the customer not participated in the Program for any period of time.

E. If a customer moves to another location within the Company's Missouri service territory the customer's subscription will also transfer.

### **2. Community Solar Participation Fee and Length of Commitment**

A. Customers enrolling in the Pilot will be assigned to the facility until all of the solar blocks for the facility are subscribed, and such customers shall pay a Solar Participation Fee of \$25 per block.

B. On and after the date the Company commits to construct the solar facility, which commitment shall occur upon the Company posting its commitment on its website and sending an email, if available, or by letter if email is not available, announcing its commitment to the enrollees assigned to the solar facility, said enrollees will be obligated to participate in the Pilot and pay the charges thereunder for a term of two years after the facility's in-service date, unless the customer no longer takes service from the Company. However, a customer that is a participant in the Program will be permitted to withdraw from the Program before the two-year commitment period has been completed only if a customer on the waitlist for which there is not a Resource available can take the withdrawing participant's place for the Resource, and the withdrawing participant will not be refunded any fees.

C. Any enrollee from whom a Solar Participation Fee has been collected who is not receiving service from a facility by the earlier of (i) the date the Company commits to the solar facility, or (ii) three years after the Community Solar tariff first becomes effective, will be refunded the Solar Participation Fee. For enrollments occurring 20 or more days before a customer's next billing cycle, the refunds shall be credited, via the customer's bill in that next billing cycle; otherwise, in the second billing cycle after enrollment or withdrawal.

D. Customers may enroll in the Pilot after the Company has committed to building the solar facility, and throughout the Pilot's operation, when solar blocks become available, without paying a Solar Participation Fee. The Company will maintain a waiting list of customers interested in enrolling in the program and will notify customers on the waiting list as and when solar blocks become available. If the customer fails to confirm their subscription within 10 days of being notified of available blocks in the program, they will forfeit their opportunity for enrollment under the program at that time and be removed from the waiting list.

**3. Total Solar Block Charge**

The Total Solar Block Charge is a combination of both the Total Facilities Charge and the Solar Generation Charge.

A. Total Facilities Charge

The Total Facilities Charge will be adjusted when rates are reset in such future rate cases by the percentage change to volumetric rates in those future rate cases.

B. Solar Generation Charge

The Solar Generation Charge associated with the Solar Block will be capped for Program Term at the initially offered level, but may decrease if incremental capacity additions to or retirements from the Resources occur and result in a lower aggregate functionalized generation cost of all Resources placed in service under this Program.

**4. General Rules and Regulations**

In addition to the Rules specified above and under the program tariff, all of the Company's General Rules and Regulations shall apply to service supplied under this Program.

Customers with Net Metering agreements or Time-of-Day Service are ineligible for the Program.
