

INVESTING IN VANDALIA AND AUDRAIN COUNTY

The Vandalia Renewable Energy Center is set to become an economic and energy engine for Audrain County.

Ameren Missouri and its predecessors have been part of the community for decades, and our track record demonstrates our commitment to Vandalia and Audrain County. Working together with neighbors and others across the county, we can realize the long-term benefits that solar generation can bring to the community.

Strengthening the community

- Energy delivered locally.
- Provides the energy needs for about 10,000 homes a year.
- Least-cost new generation, helping rates stay affordable.
- Significant local investment in constructing and maintaining the facility, utilizing local resources whenever possible and feasible.
- Significant, steady tax revenue for school district.

Location

The project site is on 420 acres of Ameren Missouri-owned land.

Proposed Project Schedule

Summer 2024: Start of approximately 15-month construction period.

Late 2025: Targeted date to generate energy for the community.
