

MOVING MISSOURI FORWARD WITH SMART ENERGY

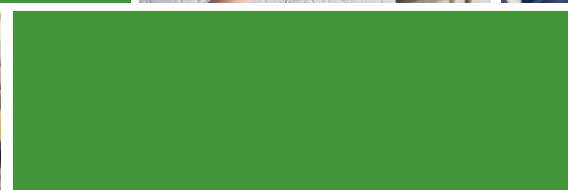

SMART ENERGY PLAN

Pershall Project

January 27, 2021

What We'll Cover

-  SMART ENERGY PLAN
-  PERSHALL PROJECT DETAILS
-  CONSTRUCTION
-  PLANNED POWER OUTAGES

-  UPDATING YOUR ACCOUNT
-  COMMUNITY RESOURCES
-  Q&A

CARBON MONOXIDE

Virtual Community Meeting

Due to COVID-19, we have indefinitely postponed all in-person meetings and events, to help keep you and our team safe and healthy.

Public engagement remains a top priority for our team. We appreciate you joining us online today to learn more about this project.

SMART ENERGY PLAN

Smart Energy Plan

We're investing in smart energy projects across the state to:

Provide clean, reliable energy

Reduce power outages

Help you manage your energy usage

Part of our mission to Power the Quality of Life for Missouri families and business.

Completed in 2020

300+ smart switches

28 new or upgraded substations to serve growing communities

128,000 smart meters

PERSHALL PROJECT

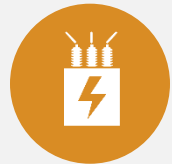

Pershall Project

Bringing more reliable energy to families and businesses in Hazelwood, Florissant and Berkeley.

Upgrades include:

A new, state-of-the-art substation

Stronger utility poles to withstand powerful Missouri storms

To make these upgrades, you will experience a few short, planned power outages

LEGEND

 Upgrade Area

Powering A Smarter Future

This project will bring:

More reliable
energy

Fewer
outages

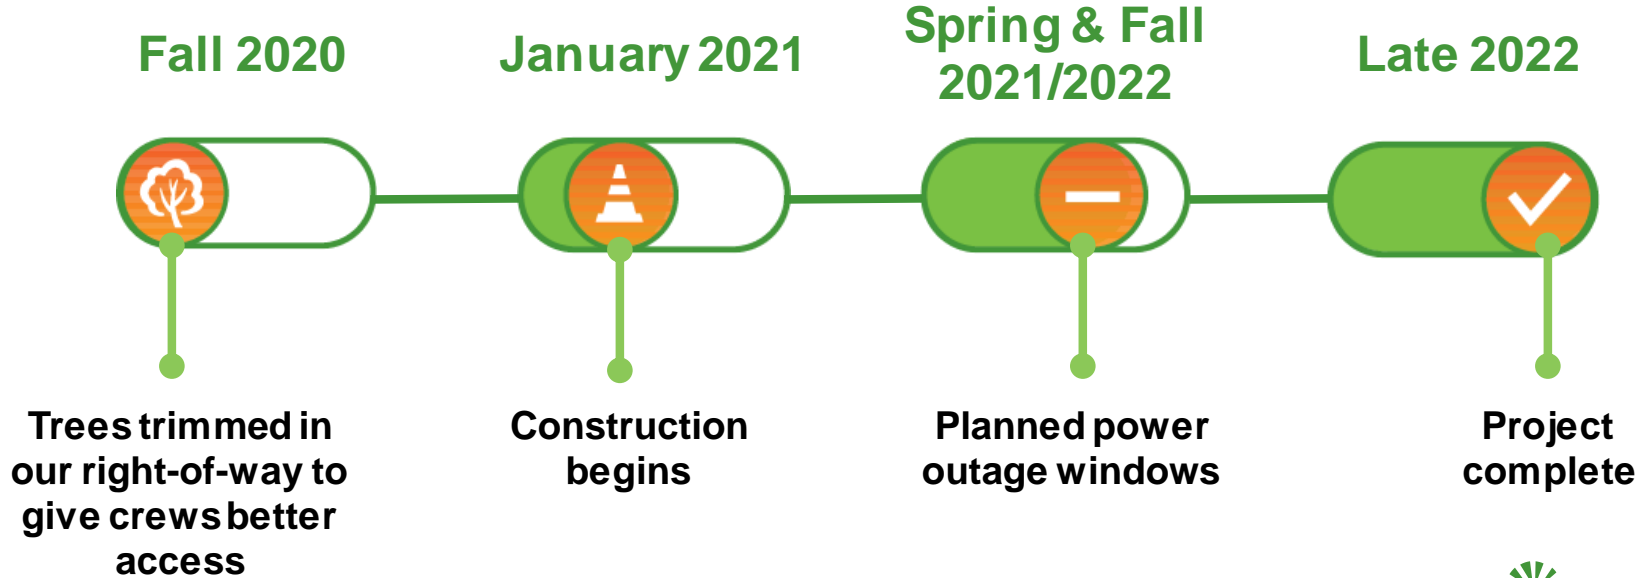

Faster power
restoration

New, state-of-the-art equipment will:

- Meet growing energy needs long into the future
- Require fewer repairs and maintenance, saving you money
- Include smart sensors and switches to rapidly detect and isolate damage

Timeline

Construction

- Construction will include:
 - Installing new storm-resistant poles and smart technology
 - Replacing equipment near your home or business
 - Switching homes and businesses over to new substation
- Most work will happen during the day
- You may see large equipment, crews along the road, temporary lane closures, noise and dust.

Construction

- An Ameren Missouri contractor will notify you with a knock on your door **24-48 hours in advance of any work on/near your property.**
- If you're not home, we'll leave a door hanger on your door.
- You will always have safe access to their home or business.
- We'll let you know when all upgrades are complete. If we do work on your property, we will restore it.

Planned Power Outages

- The Pershall Project requires a few short, planned power outages so that our crews can install new equipment and make upgrades.
- We anticipate each planned outage may last **up to four hours**.
- We will communicate with you in advance so that your family or business has time to make arrangements.

Notifications

Once we start work, look for postcards and door hangers to keep you informed.

We will also give you a call or text alert before a planned power outage if you'd like – just sign up for alerts on your Ameren Missouri account. Once enrolled, you will receive two automated calls on the day of the outage – one sharing the time work will start and another when we have restored your power.
