Natural gas costs have increased nationwide. Plan ahead by enrolling in Budget Billing today —

Keeping You Informed

Expect Rising Natural Gas Costs To Impact Your Heating Bill

When temperatures drop, natural gas usage increases as we turn up the heat to stay warm and comfortable. You may have seen news stories about the global increase in the price of natural gas and its expected impact on heating costs. We want you to be aware that, because of the higher cost of natural gas, winter heating bills are estimated to be at least 30% higher than they were last winter (assuming normal temperatures).

We recognize that these may be challenging times for some individuals and families and understand the financial burden that any increases can cause. That's why we want to help you prepare in order to minimize the potential impact:

- **Budget Billing** allows you to spread your energy costs over a longer period and avoid larger monthly bills. Under the payment plan, your bills are calculated using the average monthly bill amount based on the last 12 months.
